SSC

07/2014 – 08/2015 | Kudal

N.V. Kulkarni Vidyamandir, Pangrad

Projects

DIS CRM

Technologies: Angular 17, TypeScript, RxJS, Signals, Angular Material UI

- Developed a unified platform for cataloging and managing diamond inventory from multiple suppliers.
- Designed a centralized dashboard displaying comprehensive invoice details with Paid, Unpaid, and Overdue sections.
- Implemented separate modules for Purchase Invoices and Sales Invoices to streamline financial workflows.
- Integrated real-time synchronization with financial and ERP systems for accurate, up-to-date data representation.

DIS – Diamond Inventory System

Technologies: React, Redux, Javascript, RESTful APIs

- Developed standalone React components to modernize legacy modules and improve scalability.
- Implemented Redux state management to streamline data flow and ensure predictable application behavior.
- Reduced load times by 25% through code optimization and efficient component architecture.

- Built reusable services consuming RESTful APIs for seamless backend integration.
- Optimized inventory processing, resulting in 35% faster data handling and improved performance.

KGK CC

Technologies: HTML5/Jade, CSS3, JavaScript, jQuery, Bootstrap, Node.js, Express.js, MongoDB.

- Developed a web application for buying and selling diamonds and color stones online.
- Implemented responsive design and ensured cross-browser compatibility for enhanced user accessibility.
- Provided maintenance and performance improvements, enhancing overall functionality and customer experience.
- Created modern layouts and UI features following JavaScript and UX best practices.
